Technical Data

- **Suitable for use with high pressure water supply only.**
Not suitable for gravity-fed water heaters, low and unequal pressure networks.
- Minimum Water pressure: 150kpa.
- Maximum water pressure: 500kpa.
- Pressure over 500kpa will require a limiting valve.
- Installation shall be in accordance with the AS/NZS3500 series of standards.
- Flow rate of 3 star 9 l/m has been rated under the Australian Water Efficiency Labeling Scheme (WELS).

- **Top Inlet at the diverter.**
- **Diverter trim ring is 60mm dia.**
- **Bottom bracket mount is adjustable with max 560mm Centres.**

Install The 15mm Female Inlet Adaptor:

- At pipe-out stage install a **brass 15mm male wingback elbow** (not supplied).
 - Remove the adaptor from the diverter.
 - NOTE:** Loosen off the 2 grub screws to ensure the O-rings are not cut on the adaptor.
 - Note: The female inlet adaptor requires **MAX 10mm thread** protruding from the **finished wall**.
 - Inlet is at the top.**
 - Check the height** required with customer as there is no height adjustment.
- Cut the inlet thread, to **MAX 10mm thread** from finished wall.
- Install adaptor using a spanner or a 10mm Allen key.
 - Back edge of the adaptor to be level with the finished wall as shown.**

Install Mounting Block For Bottom Bracket:

- Mark out and install mounting block as shown in drawing and inline with the inlet to ensure rail will be straight.
 - Must screw into a wooden stud or nog.
 - Wall anchor provided for masonry walls.

Installing Rail:

- Install diverter with rail to inlet adaptor.
 - Lightly grease the O-rings on the inlet adaptor.
 - CHECK:** The **grub screws** top and bottom are **not projecting into the bore**.
 - Sealant is required behind the diverter and trim to wall for water seal.**
 - Remove the protective tape** from seal on the trim ring.
 - Carefully position trim ring** against finished wall.
 - Check** the grub screw is below the surface to ensure seal inside trim ring is not cut.
- Install bottom bracket.
 - Back off grub screw enough for attaching to mount.
 - Remove the protective tape** from seal on the trim ring.
 - Sealant is required behind bracket and trim to wall for water seal.**
 - Install rail to the mounting block and tighten the grub screw.
 - To adjust bottom rail bracket height**, back off the locking screw inside the bracket, adjust to height required and retighten screw.
 - Carefully position trim ring** against finished wall.
 - Check** the grub screw is below the surface to ensure seal inside trim ring is not cut.
- Install overhead arm to top of diverter, position and tighten the nut.
 - Lightly grease O-rings on the arm.
