

ASTRO II SHOWER MIXER **(For Mains Pressure Installations Only)** **INSTALLATION INSTRUCTIONS**

PRODUCT #

BATCH #

ATTENTION PLUMBER

To ensure the optimum performance and customer satisfaction please adhere to the following:

- **Flush out all pipe work prior to installation.**
- Installation shall be in accordance with the AS/NZS3500 series of standards.
The maximum operating pressure within any building should not exceed 500kpa.
Pressure above 500kpa can cause damage from water hammer, reducing life of appliances, taps and fittings and cause excessive noise in the plumbing system.
- Pressure over 500kPa will require a limiting valve.
- Inline filters must be installed on both hot and cold supplies (not supplied).

TECHNICAL DATA

- **Suitable for use with high pressure water supply only.**
Not suitable for gravity-fed water heaters, low and unequal pressure networks.
- Minimum Water pressure for satisfactory operation: 150kPa
- Maximum Water pressure: 500kPa
- Maximum hot water temperature: 70°C
If the Water temperature exceeds 70°C an approved Tempering Valve must be fitted.

Please leave this form with the product once installed.

STD Round & Square Shower Mixer

Mini Shower Mixer

INSTALLATION INSTRUCTIONS SHOWER MIXER

Note: The Mixer can be mounted behind finished wall surface.
STD Round & square: 37- 70mm
Mini: 39-72mm

Locate the correct position of the mixer by ensuring the “Hot” (H) inlet, enters from the left, when the outlet to the shower is at the top.

1. Position the mixer against a mounting board within the maximum and minimum depth allowed and fix.
2. Connect water supply to the mixer and from the mixer to the shower outlet.
 - a. **Do not pressure test with valve in the open position when the outlet is closed .**
 - b. Turn on water supply to the mixer and **check for leaks.**
3. Cut out an access hole in the wall lining for the mixer, as per drawing, and fix lining in place.
4. To secure the faceplate to the wall, remove the protective tape from the seal and slide the faceplate over the mixer body and position against the wall lining.
 - a. Drain hole in plate at the bottom .
 - b. Ensure seal is in place on the inside of plate for valve body.
 - c. Sealant will be required behind faceplate on uneven surfaces for water seal.
5. Install the handle onto the cartridge lever and tighten the screw under the handle and fit button.
