

INSTALLATION INSTRUCTIONS

1. Cut out mounting hole in finished wall for spout.
2. Install spout with 15mm parallel thread (not supplied).
3. For shower hose connection, install hose to the 15mm male thread below the diverter and ensure washer is in place.

After Installation:

1. Test for leaks.
2. Test the diverter spout for operation with the water running.

Operating Instructions:

1. Turn water supply on, water will flow out the aerator of bath spout
2. **Low Pressure:** Pull the diverter knob up and 1/4 turn clock-wise to hold the diverter in place for shower outlet.
To return to bath, turn off water flow and turn diverter knob 1/4 clock-wise.
3. **Mains Pressure:** The diverter is spring loaded and depends on pressure to stay engaged. With the water running, pull the diverter knob up to fully engage .
To return to bath, turn off water flow, diverter will re-set.

Do not force the diverter back into position when the water is running.

This action may damage the diverter.
